About Me

An agile, curious and collaborative Junior Web Developer with a can-do attitude who is motivated and passionate about building top-quality websites and applications. A self-starter who is a team player but also has proven competence in problem solving individually. Currently seeking a dynamic role as a Web Developer to enhance my knowledge and bring value to an exciting development team.

Related Experience

Self Study

Nov 2020 - Present - Stockholm, Sweden

Web Developer

- Front-end development experience in HTML, CSS, SASS, Javascript, Parcel JS Bundler, Webpack, Templating Languages e.g. Nunjucks, libraries such as Bootstrap and web application deployment services such as netlify to build and launch intuitive and user-friendly interfaces with both a mobile and desktop first approach.
- Familiar with web development tools such as *browserstack*, *google Lighthouse (website optimization tool)*, *Visual Studio Code*, *Chrome*, *safari and firefox dev tools*, *Github* and *NPM package manager*.
- Built various landing pages, fully responsive websites and app components from scratch using modern design patterns such as Model View Controller.
- Very familiar with developer collaboration tools such Github and it's various features.
- Built and regularly update a personal coding blog using a website static generator (Eleventy, 11ty)
- Currently self-teaching data structures, algorithms, React, SQL and other backend technologies.
- **Visit** ayoadesanya.com **to view all projects with descriptions and technologies used.**
